- A classification of each day is made.
- The total score of each athlete in each day will be a percentage taking the score of the best fisherman on that day as a reference.
- The fisherman who has obtained the best score will have 100 points.
- The following participants will be allocated in percentage value, rounded to the third decimal place according to the following formula:

SCORE CALCULATION

Athlete Score (PM) x 100

Score of the first classified (PP)

Formula: $PM \times 100 / PP = \text{Score}$.

- The final individual classification will be determined by the sum of the scores in percentage (%) of the two days.
